Zohaib Haider

Full Stack Software Engineer | AI Systems | React.js | TypeScript | Node.js | NestJS | Python | FastAPI
Islamabad, Pakistan | +92 310 5904269 | zebihaider123@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Full Stack Software Engineer with **2+ years of experience** shipping **12+ production applications** across SaaS, fintech, healthcare, marketplaces, and CRM. Strong in **React/Next.js, Node.js/NestJS, FastAPI, PostgreSQL, MongoDB, and Redis**, with solid experience building **secure multi-tenant systems, payment integrations (Stripe, PayPal, Zoho, QuickBooks), and reliable backend patterns** such as transactional outbox, idempotency, queues, and retries. Recently expanded into **AI systems**, with hands-on experience in **RAG**, **LangGraph**, **tool calling**, **MCP**, and **human-in-the-loop** workflows through the **TraceOps** project, while continuing to build practical skills in LLM fine-tuning (LoRA/QLoRA). Experienced in full-stack development and testing, with practical exposure to cloud deployment using AWS, Azure, Docker, Vercel, Render, and CI/CD.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), Python, SQL, HTML/CSS

Frontend: React.js, Next.js (App Router, Server Components, Server Actions, SSR/SSG/ISR), Redux Toolkit, Zustand, TanStack Query, Zod, Tailwind CSS, Material UI, shadcn/ui, Vite, Responsive Design

Backend & APIs: Node.js, Express.js, NestJS, FastAPI, REST, GraphQL, WebSockets, Passport.js, Webhooks, JWT, OAuth 2.0/PKCE, RBAC, Multi-Tenancy, SoapAPI, Rate Limiting, Pub/Sub, API Versioning, OpenAPI, Sentry, Logging, Error Tracking

Databases: PostgreSQL, MongoDB, Supabase, Firebase, Redis, Qdrant (Vector DB), SQLAlchemy, Drizzle, Pydantic, Mongoose, Migrations, Indexing, ACID Transactions, Row/Advisory Locks, Query Optimization, Sharding

AI & LLM: RAG, Embeddings, Reranking, LangGraph, LangChain, Tool Calling, MCP, Structured Outputs, Prompt Design, LoRA/QLoRA Fine-Tuning, PEFT, PyTorch, Hugging Face, Claude Api, OpenAI API, human-in-the-loop, LLM evaluation

Distributed Systems & Messaging: BullMQ, AWS SQS, RabbitMQ, Kafka, Inngest, n8n, Transactional Outbox, Idempotency, Leases, Retries/Backoff, Reconciliation, Background Workers, Event-Driven Architecture

Cloud, DevOps & Architecture: AWS (S3, SQS, Lambda, EC2, IAM), Docker, GitHub Actions, Cloudflare Workers, Azure, Render, Vercel, Oracle cloud, Linux, NGINX, System Design, Clean Architecture, CQRS, SOLID Principles, Design Patterns

Methodologies & Practices: Agile/Scrum, Test-Driven Development (TDD), Code Review, Pair Programming, Continuous Integration/Continuous Deployment (CI/CD), Git, GitHub, Git Flow

Integrations & Testing: Stripe Connect, PayPal, QuickBooks, Zoho Books, Apify, Web scraping, React Testing Library, pytest, Jest, vitest, Playwright, Cypress, Cheerio, Selenium ,Unit Testing, Integration Testing, E2E Testing

Professional Experience

Full Stack Developer — **Aug 2024 – Present**
Jidat IT — *Islamabad, Pakistan*

- Delivered **12+ production applications** for multiple clients across SaaS, fintech, healthcare, marketplaces, and CRM, working across system design, development, and deployment.
- Designed and built **REST/GraphQL APIs** and **multi-tenant RBAC systems** with JWT/OAuth 2.0, ownership checks, query optimization, indexing, and Redis caching.
- Integrated **Stripe, PayPal, QuickBooks, and Zoho Books** across 4+ applications (subscriptions, off-session charges, refunds, payouts, and webhook reconciliation), handling real payment flows in production.
- Improved system reliability by implementing background jobs (**BullMQ, AWS SQS**), **transactional outbox**, idempotency, and retry mechanisms. Deployed applications using Docker, GitHub Actions CI/CD, and AWS/Azure.
- Integrated **LLM-powered assistants** (Gemini, Groq, OpenAi) with role-authorized tool calling into client applications, and gained hands-on experience building **RAG + LangGraph** systems with human-in-the-loop workflows.

Relevant Projects

Drive Pilot – Driving Instructor Marketplace & Payments Platform — **Live Demo**
React.js, TypeScript, GraphQL, Apollo, Node.js, MongoDB, Redis, Stripe Connect, Socket.IO, AWS S3, Gemini

- Built a **multi-tenant marketplace** supporting student, instructor, and admin roles with map-based search, availability management, lesson slot booking, **real-time chat**, progress tracking, reviews, document verification, and OTP/social login.
- Engineered complete **Stripe Connect** payment flows including on-session checkout, **off-session charges**, commission splits, payouts, refunds, and automated recovery for failed or abandoned payments, handling payment transactions reliably.
- Guaranteed booking and payment consistency through **atomic slot claims**, **state machines**, **durable webhooks**, **idempotency keys**, **transactional outbox**, and reconciliation. Improved performance by reducing repeated database lookups with GraphQL request batching and **Redis caching** with explicit invalidation.

Dealer Flow – Dealership CRM & Inventory Intelligence Platform — **Live Demo**
React, TypeScript, Node.js, PostgreSQL, Drizzle, Redis, Apify, Playwright, AWS SQS/Lambda, BullMQ, Gemini/Groq

- Built a full dealership platform with dashboards for lead management, appointments, sales, finance, commissions, performance analytics, and employee records, including **fine-grained permission control** with approval, expiry, and revocation.
- Engineered **multi-source vehicle data acquisition** using Apify, Crawlee, and Playwright with normalization and deduplication pipelines on **BullMQ/Redis** and **AWS SQS/Lambda** workers, processing thousands of vehicle listings. Powered public inventory, comparisons, and an AI assistant with **provider fallback** and **circuit breakers**.

CaseLens – Intercom HR Case Intelligence Platform — **Live Demo**
Node.js, Express, TypeScript, PostgreSQL (pg_trgm), Redis, BullMQ, Apify, Gemini, Intercom Canvas Kit, Box

- Engineered an **AI-powered HR case intelligence system** integrated with Intercom through a custom **Canvas Kit sidebar**. Leveraged **Gemini** to analyze and classify employee conversations, generate contextual case insights, and automate conversation tagging and notes, streamlining HR support workflows.
- Implemented robust **employee matching** using aliases, typo-tolerant rules, and **PostgreSQL trigram similarity**, along with related-case retrieval and complexity-based auto-CC — running on **BullMQ/Redis** pipelines with **signed webhooks**, **transactional outbox**, and **stale-write protection**.

TraceOps – AI Incident Investigation Platform — **Live Demo**
Python, FastAPI, LangGraph, PostgreSQL, Qdrant, Redis, React 19, TypeScript, Inngest, MCP, PyTorch, LoRA/QLoRA

- Built a multi-stage **LangGraph investigation agent** with classification, authorized tool calling, analysis, recommendations, and memory, backed by a full **RAG pipeline** (PDF ingestion, embeddings, **Qdrant**, reranking, and source citations).
- Added **human-in-the-loop approval** with pause/resume checkpoints, duplicate-payment detection, a **transactional outbox**, **OAuth/PKCE-secured MCP tools**, voice input, and efficient fine-tuning using **LoRA/QLoRA**.

Education

Bachelor of Science in Software Engineering — **Sep 2020 – Aug 2024**
International Islamic University Islamabad | **CGPA: 3.66 / 4.00** — *Islamabad, Pakistan*
