Zohaib Haider

Full Stack Software Engineer | React.js | TypeScript | Node.js | NestJS | Python | FastAPI | Islamabad, Pakistan
+92 310 5904269 | zebihaider123@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Full Stack Developer with **2+ years of experience** delivering **12+ production applications** across SaaS, fintech, healthcare, marketplaces and CRM. Skilled in **React.js, Next.js, Node.js, NestJS and Python (FastAPI)**, with hands-on experience in **PostgreSQL, MongoDB, Redis, REST/GraphQL APIs, multi-tenant architectures and RBAC**. Experienced in **payment and accounting integrations (Stripe, PayPal, QuickBooks, Zoho Books)** and reliable asynchronous processing using **BullMQ, AWS SQS, idempotency and the outbox pattern**. Capable of owning features end to end, from **system design and database modeling** to **testing, CI/CD and deployment** using **AWS and Docker**.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), Python, SQL, HTML/CSS
Frontend: React.js, Next.js, Redux Toolkit, RTK Query, TanStack Query, Apollo Client, React Hook Form, Zod, Tailwind CSS, Material UI, shadcn/ui, Vite
Backend & APIs: Node.js, Express.js, NestJS, FastAPI, REST, GraphQL, WebSockets (Socket.io), Webhooks, JWT, OAuth 2.0, Passport.js, RBAC, Multi-Tenancy, Swagger/OpenAPI, Puppeteer
Databases & Caching: PostgreSQL, MongoDB, MySQL, Redis, Elasticsearch, Supabase, Firebase, Drizzle ORM, Mongoose, Indexing, Query Optimization, Transactions
Distributed Systems & Async Processing: BullMQ, AWS SQS, Outbox Pattern, Idempotency, Retries/Backoff, Background Workers, Cron Jobs, Caching Strategies
Cloud & DevOps: AWS (EC2, S3, SQS, Lambda, CloudFront, IAM), Azure VMs, Docker, Linux, NGINX, Git, GitHub Actions (CI/CD), Vercel, Render
Third-Party & AI Integrations: Stripe, PayPal, QuickBooks, Zoho Books, Intercom, Box, OpenAI API, Gemini API, Claude API
Testing: Jest, Supertest, Cypress, Playwright, Postman (Unit, Integration, E2E)

Professional Experience

Full Stack Developer **Aug 2024 – Aug 2026**
Jidat IT *Islamabad, Pakistan*

- Developed and maintained **12+ commercial web applications** across SaaS, fintech, healthcare, marketplaces and CRM, delivering responsive React.js/Next.js interfaces, scalable Node.js/NestJS backends, database integrations and end-to-end business workflows.
- Engineered **REST/GraphQL APIs, role-based dashboards and multi-tenant architectures**, implementing JWT/OAuth authentication, RBAC, database schema design, query optimization and secure third-party integrations across complex business applications.
- Implemented **payment and financial integrations across 4+ applications** using Stripe, PayPal, QuickBooks and Zoho Books, supporting subscriptions, scheduled charges, refunds, payouts, wallet transactions and reliable webhook-driven synchronization.
- Improved **application performance and backend reliability** through Redis caching, optimized database queries, asynchronous background processing, job queues, idempotency, retry mechanisms and fault-tolerant workflows to reduce redundant operations and prevent duplicate processing.
- Delivered **end-to-end features from development to deployment**, collaborating on system design, API integrations, automated testing, debugging and production troubleshooting using Docker, GitHub Actions, AWS/Azure and CI/CD practices.

Relevant Projects

DSP Marketplace – Driving Lesson Booking & Management Platform
React.js, TypeScript, GraphQL, Apollo Client, Node.js, MongoDB, Redis, Stripe

- Developed an **end-to-end driving lesson marketplace** with dedicated Student, Instructor and Admin workflows for instructor discovery, scheduling, bookings, messaging, learning progress, document verification, reviews and platform management.
- Engineered **Stripe-powered booking and payment workflows** covering lesson payments, scheduled off-session charges, refunds and instructor payouts, with idempotency and guarded state transitions to prevent duplicate transactions and inconsistent booking states.
- Optimized **GraphQL APIs, MongoDB queries and Redis caching** with explicit invalidation and database fallback; strengthened authorization and fault tolerance through ownership checks, database constraints, durable outbox processing and retry mechanisms.

HR Intelligence – Intercom-Integrated HR Case Intelligence Platform
Next.js, Node.js, TypeScript, PostgreSQL, Redis, BullMQ, Intercom Canvas Kit, Box, Apify

- Built an **HR intelligence sidebar within Intercom Inbox using Canvas Kit**, displaying employee details, case classifications, related histories and recommended CC contacts directly in agents' workflows, reducing manual navigation and lookups.
- Automated **employee identification, case categorization and related-case discovery** using conversation analysis, PostgreSQL records and Box-synchronized directories; implemented alias matching, store-specific contact recommendations and interactive re-analysis to streamline case investigation.
- Engineered **secure Intercom webhooks and asynchronous processing pipelines** using Redis/BullMQ and Apify, with HMAC verification, idempotency, revision-aware deduplication, retry/recovery and durable tracking for reliable workflows.

RTA Marketing – Automotive Sales CRM & Analytics Platform
React.js, TypeScript, Node.js, PostgreSQL, Redis, AWS SQS, Lambda, Puppeteer

- Developed a **full-stack automotive sales CRM and analytics dashboard** centralizing sales leads, customer interactions, appointments, follow-ups, vehicle deals, commissions and performance reporting, with role-based workflows for administrators, sales teams and virtual assistants.
- Integrated an **AI-powered chatbot and multi-source vehicle intelligence pipeline**, automating customer assistance and vehicle data collection using Puppeteer to support inventory searches, listing comparisons and sales decision-making.
- Re-architected **long-running scraping into AWS SQS/Lambda background jobs**, separating browser automation from API requests and adding retries, deduplication and safeguards to improve reliability and prevent request timeouts.

Education

Bachelor of Science in Software Engineering **Sep 2020 – Aug 2024**
International Islamic University Islamabad | **CGPA: 3.66 / 4.00** *Islamabad, Pakistan*
